

Standon May Day

The Steering Group asked visitors to its May Day stall what people would like to ask us when they attend our open day on 16th May 2015. Here is what they said – what will you ask?

I would like to ask:

...about A120 traffic.

...about controlled development, sympathetic architectural design and amenities.

...that you please do not build on the flood plain. The tributary behind my house is essential.

...about infill building.

...your box is not big enough for all the things I want to ask.

...about shops.

...about Puckeridge High Street. Parking and two-way traffic make it very difficult, especially whilst buses are trying to get through.

...about houses – will they be private?

...about open spaces. There are often more open spaces in towns to enjoy than in villages.

...about development of neighbouring land.

...about how we control over development

...about roads and infrastructure with extra housing. The road is already very busy at peak times.

...for parking to be considered i.e. Buntingford Road – near new development, also parking on yellow lines making Station Road/High street difficult at Crown & Falcon.

...about not counting houses built before the [local] plan...

...about the effect of new development on flooding, transport, infrastructure and services.
